Calgary, Alberta | Phone: 587-917-6874 | Email: hmehm713@mtroyal.ca |

Summary

Computer Information Systems student with practical experience in Python, networking, and cybersecurity tools. Experienced in packet analysis, vulnerability discovery, and system troubleshooting. Dedicated to preserving data and supporting Bell's cybersecurity activities through analytical thinking and teamwork.

Technical Skills

- **Programming:** Python, Java, Bash (basic)
- **Operating Systems:** Windows, Linux, macOS
- **Networking & Security:** Wireshark, tcpdump, TCP/IP, firewalls, IDS/IPS concepts
- **Databases:** SQL queries, ER modeling
- **Cybersecurity Knowledge:** SIEM fundamentals, incident response, vulnerability management
- **Soft Skills:** Communication, teamwork, problem-solving

Education

Bachelor of Computer Information Systems

Mount Royal University, Calgary, AB

Expected Graduation: April 2028

- **Dean's Honour Roll:** Fall 2024
- **GPA:** 3.8+ (2024–2025 academic year)
- **Relevant Courses:** Programming (*Python, Java*), Web Development 1 (*HTML & CSS*), Databases (*SQL and Data Modeling*)
- **Certifications:** Google Cybersecurity Professional Certificate, CompTia networking+ (in progress)

Relevant Experience

Cybersecurity Projects | June 2025 - Present

- Analyzed 500+ packets using **Wireshark** and **tcpdump** to identify anomalies in simulated networks.
- Conducted **security audits** and **risk assessments** based on simulated business scenarios.
- Applied **NIST CSF principles** to identify vulnerabilities and recommend mitigations.

- Documented findings and presented **security improvement strategies** to strengthen system defenses

Software Development Projects | Jan 2024 - Present

- Developed a **Python permissions app** to verify user and IP access rights for specific systems. Utilized **file handling**, **conditional logic**, and modular design to simulate real-world access control improving overall efficiency by 40%.
- Developed **responsive web pages** using **HTML** and **CSS**, applying semantic tags and accessibility principles.
- Designed **databases** with **conceptual and ER models** to organize structured data efficiently. Using SQL queries to then query through the database to collect required data.
- Developed a **Java Blueprint Board Game App** using **multiple classes, loops, and objects** to implement game logic and rules.

Work Experience

Bottle Sorter – Marklan Bottle Depot, Calgary, AB

March 2024 – August 2024

- Adapted to various roles around the workplace, building **teamwork**, **accountability**, and **problem-solving** skills applicable to collaborative cybersecurity settings.
